

available now corporate hangars

The Corporate Hangars are located a short taxi from the end of Runway 10L/28R on the western side of Archerfield Airport.

The Hangars have been designed for larger corporate type aircraft.

There are currently four Hangars available, each including the following features:

- hangar space for corporate aircraft
- five metres of apron with-in the leased area
- substantial office space
- \$20 000 allowance for office fit-out to suit tenant's requirements
- reverse-cycle air conditioning in offices
- toilet facilities
- kitchenette facilities
- internal car parking with remote control roller door access for one car
- external car parking for extra cars
- external landscaping

There is the opportunity to construct a mezzanine floor within the office space if necessary.

The Corporate Hangars feature revolutionary one-piece hangar doors which open by swinging out from the top until they are parallel to the ground. They then provide coverage and shelter for aircraft parked on the apron at the front of the hangar. This is ideal for loading or unloading an aircraft of either passengers or cargo.

See over for specifications and pricing. Enquiries should be directed to Claudia.
